BASIC KNOWLEDGE

Seminar *Basic knowledge – corrugated board*

We provide compact knowledge about the properties and opportunities of the exciting corrugated board material – from production to final packaging.

- Contents
- Paper varieties/properties/selection criteria/ different varieties and their characteristics/the most important selection criteria for various areas of application
 - Production of corrugated board and further processing, up to the finished packaging
 - Flute types/varieties/labelling – norms and standards
 - Common design types based on the FEFCO catalogue
 - Development of packaging solutions, requirements and optimisation examples
 - Common test methods for paper, corrugated board and packaging
 - Overview of printing and finishing options

Objective Acquire product knowledge in the field of corrugated board and its processing

Target group Employees in the areas of marketing and sales, and technically oriented staff from quality management areas

Duration 1 day including factory visit
You can also visit our testing laboratory in Remshalden

Date/ venue on request

Seminar price 295 €

Seminar *Basic knowledge – printing on corrugated board*

We provide compact knowledge about the various printing possibilities on corrugated board packaging. The seminar also highlights what needs to be considered when choosing the right printing process.

- Contents
- Introduction to the systematics of conventional printing processes
 - Suitable printing processes for corrugated board
 - Direct printing and pre-printing
 - Differences between the procedures and special characteristics
 - Selecting paper according to the print
 - Gloss
 - Characteristics of flexography
 - What is screen printing used for?
 - What is colour?
 - To which extent are proofs binding?
 - 3D – more security about the correct print centring

Objective Acquire knowledge about the printing sector and the characteristics of corrugated board printing

Target group Employees in the areas of marketing and sales
Quality Management and employees with technically oriented tasks

Duration 1 day, including a visit to a printing machine

Date/ venue on request

Seminar price 295 €

Seminar	<p><i>Packaging development</i></p> <p>We provide basic knowledge about the various requirements for packaging and to which extent they shape the duties of a package developer. The seminar also highlights the potential of early involvement in the packaging development.</p>
Contents	<ul style="list-style-type: none"> • Overview of different packaging requirements • Measurements and measurement systems/module dimensions • Influences during storage and transport • Special technological features of the corrugated board material • How is a package dimensioned? • Stack stress and box compression test (BCT) • Shelf ready packaging and packaging standards • Possibilities with computer-assisted means: Simulations, 3D, measurement systems, weak point analysis • Data exchange and workflow
Objective	Acquire basic knowledge about the optimal development process of packaging
Target group	Employees in the areas of packaging development, packaging design, product development, logistics and technology
Duration	1 day
Date/ venue	on request
Seminar price	295 €

Registration fee

The prices quoted are exclusive of VAT. You will receive the agenda and the invoice after the seminar.

Cancellations

You can cancel free of charge up to seven workdays prior to the seminar, otherwise you have to pay the full fee. Of course you can also designate a substitute. Please send us your cancellation in writing or via email.

Cancellation from our part

Seminars have to be sometimes cancelled for numerous reasons, e.g. not enough registrations or if the trainer is sick. In that case, we will let you know as soon as possible. We are sorry but we cannot accept other claims.

Copyright
