

KlingeLe Super Cobb

Perfect protection against condensation and splashed water

Long transport routes and temperature fluctuations have a negative effect on most packaging. The quality of the packaging plays a crucial role in coping with any condensation that may form. The water-repellent properties of our Super Cobb special paper ensure high packaging stability, thus optimally protecting your products during their journey.

Advantages at a glance

- Water can stand on the Super Cobb for twice as long as other heavily glued paper
- We guarantee significantly reduced water absorption for over 60 minutes with Super Cobb 3600
- High packaging stability for frozen and chilled food, baked goods, pet food, fruit and vegetables and much more
- Cost-effective alternative to fresh fibre and coated paper
- Excellent for processing and printing
- ISEGA-certified – suitable for dry and non-greasy food
- Biodegradable and 100% recyclable
