

Klinge D flute

The flute of success

With a height of 2.3 mm, the D flute fills the gap between the B and E flutes.

- Flute profile of 2.3 mm makes it lower than the B flute
- Corrugated pitch of 5.25 mm makes it smaller than the B flute
- Lower corrugated pitch improves flat crush values (FCT)
- Enables up to 26 % more corrugated board planks on the pallet
- Makes up to 20 % more warehouse space available
- Less handling
- Sheets with a better print surface
- Better folding precision
